Social media

Social media is everywhere and is a normal part of many people's lives. However, experts agree that the way we use social media will change in the future.

Ten years ago, people used social media to share messages. Then everyone got cameras on their phones and began sharing pictures and video. But if Mark Zuckerberg of Facebook is right, you and your friends will soon put on your VR (Virtual Reality) headsets and meet in amazing 3D virtual worlds. Zuckerberg and Facebook are spending a lot of money on developing VR social media.

With VR social media, it will be possible to meet your friends 'inside' pictures and videos. This means, for example, that you will be able to spend time together at the top of mountains or the bottom of oceans! It will also be possible to hang out in virtual versions of real clubs or museums, or just about anywhere in the world (or the universe) you can imagine.

There is still a lot of work to do on the technology, so you might have to wait a while before you can share your selfies from the far side of the moon! However, experts agree that VR is the future of social media.

Glossary
